

Medical language course in Germany – An excellent opportunity for starting a career as a physician in Germany

ZAB – the Central Academy for Health Professions (Zentrale Akademie für Berufe im Gesundheitswesen GmbH, <http://www.zab-gesundheitsberufe.de>) and pvmed Medical Recruitment Agency (www.pvmed.de) are delighted to be able to offer you a program of language and medical language instruction, which is an ideal preparation for working in the medical sector in Germany. The program takes place at the ZAB office in Gütersloh.

The aim of the intensive language course, taking four months, is reaching level telc German Medicine C1. Efficient learning groups of approximately 15 people will not only provide general fluency in the German language. Our experienced team of language instructors (with additional medical qualifications) plus physicians will provide you with all those specific qualifications in using medical language which you will need for all types of daily routines and situations in the course of your work as a physician.

Apart from obtaining competence in using the German language, you will also be made acquainted with the basics of the health system of Germany, including its legal framework.

This course offer is targeted to physicians, especially specialists and assistants, with several years of professional experience, who are already fluent in the German language at level B1. The required language fluency should be documented by a recognised certificate (e.g. Tel, ÖSD, Goethe Institute).

The final assessment of your German language proficiency will take place in the form of a Skype interview with ZAB's experienced language instructors.

This proficiency assessment will be required for admission to the course.

The next course will start on September 2th, 2019.

Additional information concerning the course structure, content and costs will be found in the attached information sheet or online: <http://www.zab-gesundheitsberufe.de/international/doctors/>

Should you require assistance in financing your participation in the course, please do not hesitate to let us know. We will be able to make a concrete proposal.

Parallel to the course, we can jointly prepare your „approbation“ (medical licence) in Germany, so after successfully completing the course, you may be able to start working as a medical practitioner without a long delay.

Together with you, we will actively search for job opportunities and try to allocate you to a suitable position as early as possible – at best, while the course is still running, or immediately after its completion.

For this purpose, we are planning hospitations at hospitals in the vicinity, presentations of hospitals and targeted discussions with human resources managers and medical directors.

Have we been able to wake your interest? Please get in touch as soon as possible. We will gladly supply additional information.
